Summary

Detail-oriented Computer Science & Engineering graduate with a strong foundation in software development, including Python, SQL, DSA, and Testing concepts. Hands-on experience through academic projects, internship, and freelance work using modern development practices. Strong analytical, problem-solving, and debugging skills with attention to detail. Adaptable team player with an agile mindset, eager to learn emerging technologies and build reliable software solutions.

Skills

Languages: Python, SQL, Java, DSA, Object-Oriented Programming (OOP)

Frameworks & DB: Flask, FastAPI, Bootstrap, MySQL, MongoDB

Tools & Platforms: Git, GitHub, VS Code, Postman, Conda, Google Cloud Platform (GCP)

Data Analysis & Visualization: Microsoft Excel, Power BI, Microsoft PowerPoint

Software Testing: Software Testing Fundamentals, STLC, Test Case Design, Defect Management

Soft Skills: Problem Solving, Analytical Thinking, Teamwork, Agile Mindset, Adaptability

Experience

- **Backend Engineer – Freelance** Jul 2025 – Present
Cybersecurity and Media Tec, Chennai, Tamil Nadu
 - Designed and deployed secure backend systems and API layers to enhance application security.
 - Managed multi-cloud API integrations and implemented security protocols for cross-platform data transfers.
 - Specializing in secure architecture and scalable, reliable cloud infrastructure deployment.
- **Full Stack Developer – Intern (Remote)** Dec 2024 – Feb 2025
UniConverge Technologies, Noida, Uttar Pradesh
 - Developed web-based marketplace applications across the software development lifecycle.
 - Built role-based access control, seller dashboards, and optimized frontend components to improve the performance.

Technical Projects

- **Fragment Safe – File Encryption Security & Multiple Cloud Platform**
Python | Flask | GCP | MongoDB | Bootstrap | AES/Blowfish | RESTful APIs
 - **Dual-Layer Cryptography:** Architected dual-layer cryptography (AES + Blowfish) encryption, reducing data vulnerability to maximize file protection.
 - **Multi-Cloud Integration:** Integrated with multi-cloud APIs (Google Cloud, Dropbox, Box), reducing transfer latency during authenticated cross-platform data transfers.
 - **Fault-Tolerant Erasure Coding:** Implemented a custom algorithm to split encrypted payloads into discrete, recoverable fragments distributed across clouds.
- **AI Journal Hub – Intelligent Community Journal Platform**
Python | FastAPI | CRUD | MongoDB Atlas | RAG | GenAI Model Vector Search
 - **AI Moderation & Analysis:** Added automatic checks to block unsafe content and built features to detect sentiment, emotions, categories, tags, and summaries for journals.
 - **Embeddings & RAG Search:** Used MongoDB vector search with embeddings, and integrated RAG (Retrieval-Augmented Generation), connected to Gemini so searches return answers only from journals.
 - **Analytics Dashboard:** Built a dashboard visualizing sentiment, popular topics, tags, and recent activity.

Education

- **B.E – Computer Science and Engineering** 2025
Aalim Muhammed Salegh College of Engineering, Avadi, Thiruvallur CGPA: 8.1
- **HSC – Mathematics with Computer Science** 2021
Raj Vidyalyaya Matriculation Higher Secondary School, Kuttalam, Mayiladuthurai Percentage: 86%

Certificates

- JPMorgan Chase – Software Engineering Job Simulation
- Python Full Stack Development – Besant Technologies, Guvi
- MongoDB – Smart Internz, Cybersecurity – IBM SkillBuilds
